**PREMIUM-GRADE BLUETOOTH MONO HEADSET FOR PROFESSIONALS**

# DUAL MICROPHONE CVC

# ARGO 70

For logistics professionals, the three most important features when choosing a bluetooth handsfree are (1) Comfort, (2) Durability and (3) Clarity. Argo 70 is ultra-lightweight with soft silicon earbuds which fits both side wearing. It is highly durable with 9 hours continuous talk-time and USB-C quick charging. In terms of sound management, Argo 70 uses 2 independent microphones for Active Noise Cancellation using Qualcomm's CVC 8.0 technology, it is the go-to choice for business communication in the noisiest environments.

Highly sophisticated in its design, Argo 70 uses QCC3020 chipset with bluetooth version 5.1 guaranteeing reception range and stable connectivity. It also supports multipoint pairing, which means it can simultaneously connect to more than one devices. User can switch between two devices (ie. smartphone and notebook) without the need to disconnect and unpair a device first and then re-pair and re-connect another.

Argo 70 comes with most common bluetooth handsfree features, including digital volume controls, repeat/skip track, answer/end phone calls, microphone mute and a dedicated button for voice assistants including Siri and Google Assistant. Argo 70 uses USB Type-C for charging and comes with a hard carrying case.
