Remove Noise

Converse 6 Mark II | Professional USB Headset with Active Noise Cancelling Microphone.

DeepOcean 2.0

DeepOcean™, the Active Noise Cancellation Technology that made Lexus 1010 ProNC into the most popular high-end USB headset from Accutone® has been upgraded to version 2.0. Equipped inside the strongest, and most durable premium headset Converse 6 Mark II, the latest addition to the ProNC series is powerful both inside and out, capable of doubling its ability to reduce background noises compared to version 1.0, maxed out at 30dB. Even in the noisiest call center, or outdoor environments, the newest Converse 6 Mark II-ProNC only picks up the user's voice signals, delivering the clearest, cleanest audio transmission demanded by true professionals. You have to try it to experience how powerful this active noise cancellation is.

On top of superb microphone performance, the Converse 6 Mark II comes with dual 40mm voice-centric loudspeakers, designed for superb binaural audio output. Besides top-level acoustics, Converse 6 Mark II headset is famous for its hexagon-shape structure, built for strength and long-lasting durability. Comes with premium-grade leatherette headband and ear-cushions, it is highly comfortable, perfect for extensive use in the toughest environments.

Converse 6 Mark II is compatible with Microsoft Teams with Answer/End call button, digital volume controls and quick mute.
