DUAL-MICROPHONE ACTIVE NOISE CANCELLING BLUETOOTH HEADSET

CLARITY IN CHAOS

SONAR 75

The brand new Sonar 75 from Accutone® is the best Active Noise Cancelling wireless headset for business applications. Using two microphones to offset background noise by DSP algorithm, the headset allows clear communication in the noisiest environments. Elegantly designed with a strong built, Sonar 75 is designed for professional office use. Its fit and comfort allow users extended usage during office hours on video conference and voice calls, common in the new era of virtual business meetings.

In terms of business usage, Sonar 75 offers ultra-quick bluetooth pairing and reconnection, as well as stable and long range connectivity. Using a pair of wideband 40mm loudspeakers and highly-sensitive -38dB omni-directional microphone, it is the perfect productivity tool for corporation, offices as well as business on-the-go. Sonar 75 further comes with a unique feature in the form of MicArmMute™, which digitally mutes the microphone when a user flips the microphone arm upwards, an audio prompt will help user aware of the mute status.

Sonar 75 is also a Dual-Audio headset, allowing both wireless and wired connectivity. Aside from bluetooth connection, user can also choose to connect via 3.5mm audio cable for battery-free audio usage.
