USB220 | ULTRA-LIGHTWEIGHT USB HEADSETS FOR BUSINESS APPLICATIONS

LIGHTWEIGHT & AFFORDABLE

220 SERIES

As work from home is becoming more and more popular, social-distancing gives rise to a huge demand in communication headset for audio/video conferencing. Accutone® understands the need for an affordable solution which does not compromise reliability and acoustic performance.

Series 220, is an ultra-lightweight headset solution with a long list of features at a highly competitive price point, designed for the full adaptation of headset use for every employee in the office. Maintaining the Accutone's on superb noise-management and audio output, 220 is designed for voice communication, reducing high-pitch and low-humming noises during virtual meetings and conferences. Comes with a pair of high-grade permeable ear-foam, users can wear our headset for prolonged period of time with unparalleled comfort. Time and time again, the 220 headset is ranked at the best headset in terms of price-quality ratio.

The 220 headset comes with 30mm driver units with passive noise-cancelling microphone. The 2.4m long USB cable includes a digital volume control with volume buttons and microphone mute as well as LED-indicator.
